

# Trinity of success with Trimex

**30 years** of sourcing, processing & delivering  
**3 decades** as leading metal & mineral conglomerate

Trimex Group, with thirty years of experience in value addition of minerals, has evolved into one of the world's leading mining and mineral processing conglomerate delivering value added solutions to the oil-drilling, glass, ceramics, construction, pigments, refractories, coke/energy and fertilizer industries.

Trimex Sands, which is a part of the Trimex Group, operates a state-of-the-art heavy minerals mining and processing facility in Srikakulam producing Ilmenite, Rutile, Sillimanite, Garnet and Zircon from Heavy Mineral Sands. The rich experience of the Group in sourcing and value addition allows it to offer customized raw material solutions to the end user. Trimex Sands is in the process of setting up an integrated Titanium complex in the state of Andhra Pradesh.
